

# Responsible Construction Contracting

for

## Michigan's Public Schools, Colleges and Universities

The purpose of this paper is to provide information about a qualifications-based approach to construction contracting for public entities. This concept is known as *responsible contracting*. In some states the concept is known as best value contracting. Definitions, principles, rationale and issues of quality are detailed. Sample criteria, rating sheets and charts are included to illustrate the need for responsible contracting in Michigan's Public Schools, Colleges and Universities.

Some Michigan Schools Who Have Adopted a Policy on Responsible Contracting .....	13

“School districts should carefully consider the types of qualifications reasonably believed to be necessary to perform the required work and include such qualifications and criteria in the bid documents so that contractors are on notice that these qualifications and criteria will be considered in reviewing the bids. School districts are well advised to include reasonable and pertinent qualifications and criteria in bid documents to ensure the selection of qualified contractors.” *Mika Meyers Beckett & Jones PLC*

## **What Is a Responsible Contractor Policy?**

A Responsible Contractor Policy is a set of enforceable qualifications adopted by a formal meeting of the board of education (trustees) and incorporated into the school's construction bid specifications by the school's construction manager and design professionals. Once adopted and generated into the bid documents, these important qualifications let the entire community know that your district wants competent and qualified construction firms and personnel to build and renovate your schools.

- Having a Responsible Contractor Policy in place and included in the bid specifications enables the school to put all bidders on notice that quality criteria in addition to the lowest price will be considered when bids are reviewed to ensure the selection of qualified construction professionals in the building and renovating of your schools.
- Schools that adopt a Responsible Contractor Policy are protecting the interests of the citizens who are depending on the school to assure quality construction at the lowest possible cost.
- Responsible contracting assures the safety of students and staff in regards to their security and well-being.

## **Why Should Boards of Education (Trustees) Enact a Responsible Contractor Policy?**

- Contracting out for construction has potential risks for schools.
- Excessive change orders, back-charges, delays, inefficiencies, unfinished work and embarrassment are just some of the problems that plague school construction projects when a construction bid is awarded to an unqualified bidder.
- School projects are measured on quality for the cost and not vice versa.

## **Some Taxpayer Assurance Issues to Consider**

How does the school district assure taxpayers that:

- A qualifications-based process will be used in selecting construction contractors?
- Prevailing wage laws or other wage standards or rates will be used by contractors and enforced by the school district?
- Contractors will comply with social security, unemployment compensation and workers compensation laws?
- Unqualified persons will not be working on the job site?

## The Foundation of Safe School Buildings Begins with a Responsible Contractor Policy

- A Responsible Contractor Policy is founded on generating enforceable qualitative criteria that is rationally related directly to a quality built school construction project.
- Michigan law mandates quality in bids, not just consideration of price.
- Contractors and their employees that do not meet the school's definition of quality should not be awarded a school construction project just because they submit the lowest bid.
- A Responsible Contractor Policy will actually promote greater competition among quality bidders enabling the school to award construction contracts to bidders who are both the lowest and responsible.

## The Community Can Accept Nothing Less

A Responsible Contractor Policy promotes the essential qualifications contractors and their employees must have before they are awarded a contract to build schools. If they don't have the qualifications, they should simply not be hired.

High standards for school construction should not be an option! We must have stringent construction policies in place before we build our schools, to ensure each building is a sanctuary of safety for everyone who walks through the door. There is nothing more important than being absolutely positive that there is a Responsible Contractor Policy in place when your schools are renovated or built. In fact, nearly 50 years ago Michigan's Attorney General observed, ". . . **it is incumbent upon the Board to determine the abilities of any prospective contractor and make the award, if it makes any at all, to the lowest responsible bidder.**" (O.A.G. 1959-1960, Vol. 1, No. 3303, p.169, 171.)

**Responsible Contractor Policy is Good Public Policy!**

## **A School's Sample Checklist of Critical Factors to Consider in the Development of a Responsible Contractor Policy**

The following factors are typical of the kinds of criteria that are contained in a Responsible Contractor Policy. These factors should be considered discussion points as each school's board determines what factors are in the best interest of their community to be contained in their own policy. This list is not intended to be all inclusive or exhaustive. A Rating System is shown on page 7 and an Evaluation Chart is shown on page 10 on how the criteria could be used.

- √ General information about the contractor's company, its principals, and its history, including state and date of incorporation.
- √ Trade categories and information regarding the state and local licenses and license numbers held by the applicant.
- √ A confirmation that all sub-contractors, employees and other individuals working on the Construction Project will maintain current applicable licenses with the Michigan Bureau of Construction Codes and Fire Safety and as may otherwise be required by law for all licensed occupations and professions.
- √ The ratio of masters or journeypersons to apprentices proposed to be used on the construction project job site.
- √ Documentation that the contractor maintains, participates in, and contributes to a bona fide apprenticeship-training program.
- √ Verification that unqualified persons will not be used on the job site.
- √ Documentation of a completed MIOSHA-approved safety-training program for employees used on the proposed job site.
- √ Evidence of a worker's compensation Experience Modification Rating ("EMR"). Preference will be given to contractors and subcontractors who exhibit an EMR of 1.1 or less.
- √ A list of similar projects completed within the past five (5) years, including dates, clients, approximate dollar value, and size. Documentation from these previous projects of comparable size/complexity, including but not limited to all costs relating to the bidder's timeliness, performance, quality of work, extension requests, contractual fines and penalties imposed (including proof of such fines and penalties), liens filed, history of claims for extra work and any contract defaults with an explanation of the reason for the default and how the default was resolved.

- √ Evidence of experience with construction techniques, trade standards, quality workmanship, project scheduling, cost control, management of projects of comparable size/complexity, and building codes by documenting the bidder's ability and capacity to perform the project. The bidder must identify those portions of the project it reasonably believes will be sub-contracted in the names of the sub-contractors.
- √ Audited financial information current within the past twelve months, such as a balance sheet, statement of operations, and bonding capacity. Evidence that the applicant has financial resources to start up and follow through on the project(s) and to respond to damages in case of default as shown by written verification of bonding capacity equal to or exceeding the amount of the project. The written verification must be submitted by a licensed surety company rated ("B+" or better) in the current A.M. Best Guide and qualified to do business within the State of Michigan.
- √ A warranty statement regarding labor and materials.
- √ A list of all litigation and arbitrations currently, pending and within the past five (5) years, including an explanation of each. Evidence of satisfactory resolution of claims filed by or against the contractor asserted on projects of the same or similar size within the last five (5) years. Any claim against the contractor shall be deemed to have been satisfactorily resolved if final judgment is rendered in favor of the contractor or any final judgment rendered against the contractor is satisfied within ninety (90) days of the date the judgment became final.
- √ Proof of insurance, including certificates of insurance, confirming existence and amount of coverage for liability, property damage, workers compensation, and any other insurances required by the proposed contract documents.
- √ Provide references from individuals or entities the contractor has worked for within the last five (5) years including information regarding the records of performance and job site cooperation.
- √ Evidence of compliance with the federal Fair Labor Standards Act; Social Security Administration, with regulatory agencies such as EPA and OSHA; Michigan Department of Labor and Economic Development including Worker's Compensation and Unemployment Compensation laws; and other applicable State and Federal laws.
- √ A criminal records check.
- √ Evidence of any quality assurance program used by the contractor and the results of any such program on the contractor's previous projects.

- √ Identification of whether the contractor's work force is drawn significantly from area residents.
- √ Documentation that the contractor provides health insurance and pension benefits to its employees.
- √ Verification of an existing Fitness for Duty Program (drugs and alcohol) of each employee working on the proposed jobsite.
- √ Evidence of Equal Employment Opportunity Programs for minorities, women and small businesses.
- √ Have an existing Michigan School-to-Registered Apprenticeship Program partnership with a school district or intermediate school district/secondary career technical center within the boundaries of the school district.
- √ Assurance that all construction work for this project shall proceed economically, efficiently, continuously and without interruption.

## School District Sample Responsible Contractor Evaluation Rating System

This sample Responsible Contracting Policy Rating System is provided for illustrative purposes only and is designed to show how a Responsible Contracting evaluation process might be implemented. The example does not represent an actual project or case study by the West Michigan Construction Alliance. The factors and ratings are only offered for the purposes of illustrating one possible framework for an evaluation of bidders where quality factors in addition to price are considered in the awarding of public sector construction projects. The school district should seek assistance from their construction professionals in compiling evaluation data from bidders. It's the bidder's responsibility to attach documentation in support of each criterion.

This rating system would only apply to the low bidder and any other bidder on the project who was within 5% of the low bid. The low bidder would receive 25 points. Other bidders who are within 5% of the low bid would receive 10 points. Any one of the bidders who is being rated by this process who receives a "fail" in Table 1 or fails to submit any required forms, documents, or permits, in regards to the school district's Responsible Contractor Policy and Rating System, the contractor's bid will no longer be considered. The bidder who receives the most points in this rating process will be recommended to the board of education for the bid award. A Rating Chart on page 10 would be used in conjunction with this rating system.

**Table 1**

Criteria	Description	Rating
Legal	A list of all pending litigation and all litigation within the past five (5) years, including an explanation of each. Evidence of satisfactory resolution of claims filed by or against the contractor asserted on projects of the same or similar size within the last five (5) years. Any claim against the contractor shall be deemed to have been satisfactorily resolved if final judgment is rendered in favor of the contractor or any final judgment rendered against the contractor is satisfied within ninety (90) days of the date the judgment became final.	Pass/Fail
	Evidence of experience with construction techniques, trade standards, quality workmanship, project scheduling, cost control, management of projects of comparable size/complexity, and building codes by documenting the bidder's ability and capacity to perform the project. The bidder must identify those portions of the project it reasonably believes will be subcontracted in the names of the subcontractors.	Pass/Fail
	Documentation from all previous projects of comparable size/complexity within the past five years, including but not limited to all costs relating to the bidder's timeliness, performance, quality of work, extension requests, contractual fines and penalties imposed (including proof of such fines and penalties), liens filed, history of claims for extra work and any contract defaults with an explanation of the reason for the default and how the default was resolved.	Pass/Fail
	Evidence of compliance with the federal Fair Labor Standards Act; Social Security Administration, with regulatory agencies such as EPA and OSHA; Michigan Department of Labor and Economic Development including Worker's Compensation and Unemployment Compensation laws; and other applicable State and Federal laws. Verification that unqualified persons will not be used on the job site.	Pass/Fail
Financial	Audited financial information current within the past twelve months, such as a balance sheet or statement of operations.	Pass/Fail
	Evidence that the applicant has financial resources to start up and follow through on the project(s) and to respond to damages in case of default as shown by written verification of bonding capacity equal to or exceeding the amount of the project. The written verification must be submitted by a licensed surety company rated ("B+" or better) in the current A.M. Best Guide and qualified to do business within the State of Michigan.	Pass/Fail
Safety	Contractor's current Experience Modification Rate (EMR) is less than or equal to 1.1	Pass/Fail

Table 2 represents points awarded for being the low bidder as well as other bidders who are within 5% of the low bid.

Table 2 Bid Rating Scale: 25= Low Bid, 10=Bid Within 5% of Low Bid

Criteria	Description	Rating
Bid	1 <sup>st</sup> Low Bid Construction Company (25 points)	
	2 <sup>nd</sup> Low Bid Construction Company (10 points)	
	3 <sup>rd</sup> Low Bid Construction Company (10 points)	
	4 <sup>th</sup> Low Bid Construction Company (10 points)	

Table 3 represents factors considering the management qualities of the contractor.

Table 3 Quality Rating Scale: 5= Exceptional, 3=Acceptable, 1=Marginal, 0=Unacceptable

Criteria	Description	Rating
Management	General information about the contractor's company, its principals, and its history, including state and date of incorporation.	
	Trade categories and information regarding the state and local licenses and license numbers held by the applicant.	
	A list of school projects completed within the past five (5) years, including dates, clients, approximate dollar value, and size.	
	Proof of certificates of insurance, confirming current worker's compensation coverage, public liability and property damage insurance according to the scope of the construction project and/or as required by law.	
	Provide references from individuals or entities the contractor has worked for including information regarding the records of performance and job site cooperation.	
	A warranty statement regarding labor, equipment, and materials.	
	Successful implementation of a quality assurance program such as ISO 9000.	

Table 4 represents technical factors such as education, training and qualifications of the contractor's workforce.

Table 4 Quality Rating Scale: 5= Exceptional, 3=Acceptable, 1=Marginal, 0=Unacceptable

Criteria	Description	Rating
Technical	Evidence of certification or other qualifications, which shows contractor and/or employee(s) are certified/qualified and competent in performing the work for which they have bid.	
	The proportion of journeypersons to apprentices used on the proposed job site for each trade area if the contractor is using less-than-qualified journeypersons on the proposed job site.	
	Documentation in an apprenticeship-training program such as the U.S. Department of Labor's Bureau of Apprenticeship Training Program.	

Table 5 represents safety factors in consideration of the contractor’s workforce.

Table 5 Quality Rating Scale: 5= Exceptional, 3=Acceptable, 1=Marginal, 0=Unacceptable

Criteria	Description	Rating
Safety	Documentation of a completed safety-training program for employees used on the proposed job site.	
	Verification of an existing Fitness for Duty Program (drugs and alcohol) of each employee working on the proposed jobsite.	

Table 6 represents community factors in consideration of the contractor’s workforce.

Table 6 Quality Rating Scale: 5= Exceptional, 3=Acceptable, 1=Marginal, 0=Unacceptable

Criteria	Description	Rating
Community	Evidence of Equal Employment Opportunity Programs for minorities, women and small businesses.	
	Have or will hire a significant percentage of qualified workers who reside in the school district.	
	Evidence that the contractor provides health insurance and pension benefits to its employees.	
	Have an existing Michigan School-to-Registered Apprenticeship Program partnership with the school district or intermediate school district/secondary career technical center.

Special Note: During the rating process, each Bid Category would have its own page of Contractors. Rating criteria could include a point system, pass/fail rating or combination of ratings where both a point system and pass/fail criteria could be considered.

In Consideration of Total Costs  
**COMPARISON OF LOW BID &  
 RESPONSIBLE CONTRACTING FEATURES**

<b>LOW BID FEATURES</b>	<b>RESPONSIBLE CONTRACTING FEATURES</b>
<ul style="list-style-type: none"> <li>• Minimum qualifications and screening</li> <li>• Project awarded solely on basis of low bid</li> </ul>	<ul style="list-style-type: none"> <li>• Extensive qualifications and screening</li> <li>• Projects awarded on the basis of price, past performance and the firms resources and qualifications</li> </ul>
<b>Results</b>	<b>Results</b>
<ul style="list-style-type: none"> <li>• Poor quality</li> <li>• Delayed schedules, claims, disputes &amp; litigation</li> </ul>	<ul style="list-style-type: none"> <li>• Best quality</li> <li>• On-time, on-budget delivery, cooperation &amp; partnership</li> </ul>
<ul style="list-style-type: none"> <li>• Minimal incentive to perform once contract is awarded</li> <li>• Performance on project largely irrelevant to winning future projects</li> <li>• Minimal compliance with plans &amp; specifications</li> <li>• Least-cost interpretation of bidding documents</li> </ul>	<ul style="list-style-type: none"> <li>• Maximum incentive to perform once contract is awarded, incentive to excel</li> <li>• Performance on one job can determine opportunity for next job</li> <li>• Full compliance with specifications &amp; quality workmanship</li> <li>• Quality oriented interpretation of bidding documents</li> </ul>
<ul style="list-style-type: none"> <li>• Marginal performance throughout contract; same for every job</li> </ul>	<ul style="list-style-type: none"> <li>• Maximum performance throughout life of contract; critical for every job</li> </ul>
<ul style="list-style-type: none"> <li>• Expectation of only minimal qualifications/marginal performance</li> <li>• No relative weight/credit given to key performance capabilities impacting success, such as craft training &amp; staffing, equipment, quality control</li> <li>• No incentive to invest in key performance capabilities</li> </ul>	<ul style="list-style-type: none"> <li>• Expectation of top qualifications/successful project performance</li> <li>• Critical/decisive weight &amp; credit given to key performance capabilities</li> <li>• Every incentive to invest in performance capabilities, smart business to invest</li> </ul>
<ul style="list-style-type: none"> <li>• Irrelevant that bidder "A" has a qualification/performance package 10 times better than bidder "B" -- if bidder "B" is 2 cents lower on the bid</li> </ul>	<ul style="list-style-type: none"> <li>• Bidders with marginal qualifications are weeded out, bidders with good to excellent performance capabilities win, provided their bid price is reasonable in relation to project estimate and other bids</li> </ul>
<b>Bottom Line</b>	<b>Bottom Line</b>
<ul style="list-style-type: none"> <li>• False savings from poor quality, late delivery, cost-overruns, excessive claims, hassles and headaches</li> <li>• Virtual absence of accountability</li> <li>• Poor results for school officials, students, community &amp; quality contractors</li> <li>• Taxpayers suffer the consequences</li> </ul>	<ul style="list-style-type: none"> <li>• Successful project delivery in terms of quality, cost, schedule and cooperation</li> <li>• Maximizes accountability</li> <li>• Quality results for school officials, students &amp; community</li> <li>• Taxpayers get what they paid for</li> </ul>

## Some Michigan Schools Who Have Adopted a Policy on Responsible Contracting

Allendale Public Schools	Montabella Community Schools
Atlanta Community Schools	Montague Area Public Schools
Bangor Township Schools	Mt. Morris Consolidated Schools
Buena Vista School District	Muskegon Public Schools **
Chelsea School District	Newaygo County RESA
Climax-Scotts Community Schools	Newaygo Public Schools
Decatur Public Schools	Orchard View Schools
Flat Rock Schools	Otsego Public Schools
Gull Lake Community Schools	Pennfield Schools
Fremont Public Schools	Saginaw Public Schools
Kent City Community Schools	Sanilac ISD
Galesburg-Augusta Community Schools	Swan Valley School District
Lakeview School District	Trenton Public Schools
L'Anse Creuse Public Schools	Tri County Area Schools
Lincoln Consolidated School District	West Branch-Rose City Area Schools
Mason County Central School District	Western Michigan University
Mendon Community Schools	White Cloud Public Schools
Meridian Public Schools	Yale Public Schools
Michigan Association of School Boards *	

\*The Michigan Association of School Boards has adopted an optional sample responsible contractor policy. The original contribution of language in the formulation of the sample policy was provided by the West Michigan Construction Alliance and the Michigan Building and Construction Trades Council. The above organizations and their designated and authorized representatives have full rights to the use of this sample policy.

\*\*Muskegon Public Schools was the first Michigan school district to adopt a responsible contracting policy.

Material content was made possible in part by the Michigan Association for Responsible Contracting.

Ed Haynor has over twenty years of experience as a Michigan school board member at Newaygo Public Schools and Newaygo County RESA. As a board member, Mr. Haynor has public policy experience through recent and relevant construction projects.
