

B&V Mechanical Awarded MSCA Green STAR Contractor Certification

B&V Mechanical, a full service mechanical construction company, was awarded the MSCA GreenStar Contractor Certification. B&V Mechanical earned this distinction by successfully demonstrating its commitment to environmental stewardship throughout the company. The Green Star designation confirms that B&V Mechanical possesses the skills and expertise necessary to deliver energy-efficient, cost-effective indoor environmental solutions.

The MSCA Green STAR is an achievement designation for service excellence awarded to an elite group of mechanical service contractors by the Mechanical Service Contractors of America (MSCA), the nation's leading trade association representing the heating, ventilation, air conditioning and refrigeration (HVACR) service contractor. Companies that obtain the GreenStar certification are recognized as the leaders in the Green movement within the HVAC industry demonstrating environmental responsibility.

“We pursued this certification to demonstrate that B&V places a high priority on environmentally conscious construction practices”, commented Andy VanderMoren, Project Engineer/Certified Energy Manger/LEED AP.

B&V Mechanical is only one of thirty-one in the nation and one in six in the state of Michigan that has qualified as a MSCA Green Star.

B&V Mechanical, Inc. located at 400 32nd Street SE Wyoming, MI (616-243-7222) is a full service mechanical, plumbing, and maintenance company. They specialize in all phases of mechanical construction for commercial and industrial clientele. The company provides licensed engineering and design services for HVAC and plumbing systems. B&V has an excellent background in both conventional and design/build construction delivery systems. They operate a 24-hour service department, with over 100 service contracts for commercial, industrial and municipal clients.

B&V is fully licensed and insured. They hold a master plumbing license, mechanical contractor's license and a state boilers license. The company is a member of the American Society of Refrigeration, Heating & Air Conditioning Engineers, Construction Financial Management Association, Mechanical Contractors Association of America, Michigan Plumbing and Mechanical Contractors Association, National Certified Pipe Welding Bureau, and the West Michigan Mechanical Contractors Association.

B&V Mechanical is a member of the West Michigan Mechanical Contractors Association (WMMCA), the local affiliate of the national MSCA.
