GONE GREEN YET?

Hurst Mechanical proudly announces that Cheri Holman has obtained LEED AP accreditation from the USGBC (US Green Building Council). Cheri and the *Hurst Green Team* will be specializing in LEED certification for **Existing Buildings** (EB).

No longer just for new construction, LEED certification can now be awarded to existing buildings offering your company environmental, economic, health, and community benefits using best practices in operations and maintenance.

Hurst Mechanical's Green Team will facilitate your company in streamlining the process of obtaining your buildings LEED certification. While many credits can be obtained with low or no initial investment, others can prove an incredibly fast payback. Let us show you how easy it is to be green.

Think you can't afford to go green? You can't afford not to!

HVAC System Design
Indoor Air Quality Analysis
Controls – Pneumatic & DDC
Refrigeration – Ammonia & Freon

Heating
Air Conditioning
Electrical
Plumbing

Pipe Fitting, Welding & Air Piping
Cooling Towers & Pump Packages
